CARD HOLDER INFORMATION (as it appears on your card or statement)

☐ Visa   ☐ Master Card   ☐ American Express

Name: _____

Credit Card Number: _____

Expiry (Valid) Date: _____ *Security #: _____

*The Security Code adds a level of security to your transactions with Columbia International College. Telephone & Email transactions can be higher risk because we cannot physically see the card and ask for a signature.   This code does not reveal any extra information to us about you or your company. It simply helps protect you and us from fraudulent abuse of your card by others. The 3-digit Security Code feature on the back of Visa and MasterCard and the 4-digit code found on the front of American Express helps us ensure your credit card transactions.

Visa/Mastercard:
All Visa and Mastercard cards have a 7-digit code in the signature panel on the back of the card. The last three digits of this code are the Security Code.

American Express:
American Express has a 4-digit Security Code printed on the front just above and to the right of the embossed credit card number.
